Languages: Java, Golang, Html, CSS, C
Database: MySQL, PostgreSQL
Other: Docker, Aws services

Experience

CTY REMOTE PROJECT INTERN AT HPE   MAR 2020 – JUL 2020
Hewlett Packard Enterprise   *Vellore, India*
- Built a three-tier application using Golang for backend and Webservices, Postgres for database and RabbitMQ for Message bus
- Migrated the on-premise application to amazon web services with minimal changes
- Worked in a team of four to automate the task of uploading the file to three tier applications on both on premise and on cloud

INTERN AT EDHAD.COM   Nov 2020 – Dec 2020
- Developed content for new upcoming website for previous gate papers and worked on frontend development of the webpages

Projects

Containerizing virtualized applications
- Worked in a team of five to build a inter communication between containers using Docker
- Built three containers- Database image, Keystone image and glance image on same network
- Achieved the connection between running containers and one container can access the information from other running containers

Health-e-Locker
- Built a platform for reducing the usage of documents while visiting a hospital using HTML, CSS for front end and Golang for backend webservices
- Used Postgres for database and worked on controlling the traffic on the webpage using Message bus
- Migrated the application to AWS seamlessly by containerizing the application and by using the amazon services like RDS, AmazonMq, ECS, ECR

Lor Generator in college website
- Developed a banking website with front-end including html, CSS, JavaScript and backend using php and database using MySQL
- The student can apply for Lor with proper details and can upload the relevant proofs from student portal and on the other side Faculty can review the details and send the mail using Mpdf library and can upload the Lor with one click.

Extracurricular activities

- Event manager of Sahiti club in Vit, Vellore
- Organized and managed college events with a crowd of 1000 students
